

## Civil Engineering Project

SALT LAKE VALLEY HEALTH DEPARTMENT  
SOUTH MAIN CLINIC

### Healthcare Project

#### PROJECT DESCRIPTION:

- ◆ McNeil Engineering provided civil engineering design services including a horizontal control plan, grading and drainage plan, utility plan, erosion control plan and necessary details and specifications to construct a 25,000 square foot medical clinic building with 43 parking stalls.
- ◆ The existing parking lot to the south remained as is with no improvements or reconstruction except to add a drive approach tying the two parking lots together.
- ◆ Registered for LEED Certification.
