

### WESTMINSTER COLLEGE MELDRUM SCIENCE CENTER **Educational Project**

#### PROJECT DESCRIPTION:

- ◆ McNeil Engineering provided civil engineering design services for this state-of-the-art 4-story educational science building containing 60,000 square feet including 14 labs and an entire floor dedicated to undergraduate research.
- ◆ The Meldrum Science center is the only LEED Platinum certified higher education building in the state of Utah. As part of the LEED program all storm water from the site is collected and re-used to irrigate the landscaping. McNeil engineering has been involved in over a dozen different projects on campus spanning the last decade.
