

MT. PLEASANT 2-3-4 WARDS PARKING LOT ADDITION **Religious Project**

PROJECT DESCRIPTION:

- ◆ For this project, the LDS Church in Mt. Pleasant needed to expand their parking capacity. They purchase an adjacent residential lot, and as a part of the project, had the existing home razed.
- ◆ We provided design and documents to handle the demolition and then the new construction of an additional parking area to supplement the existing parking, which was severely limited. We added nearly 60 stalls and tied the two parking areas together with an existing access road.
- ◆ In spite of the remote location of the site, we were able to work well with the contractor and put together a completed project that completely met the needs of the expanding congregation.
