

Civil Engineering Project

JORDAN RIVER PARKWAY PEDESTRIAN TUNNEL

Municipal Project

PROJECT DESCRIPTION:

- ◆ The Jordan River Parkway Pedestrian Tunnel was a project we were excited to be a part of. McNeil Engineering donated all of its time and efforts to this project. As part of the project we acted as technical consultants for the University of Utah students Senior Design Project. We worked closely with the students to prepare a feasibility analysis of a pedestrian tunnel and an overhead pedestrian bridge.
- ◆ McNeil Engineering, along with the students then presented their findings to the City Councils of both Sandy and West Jordan Cities.
- ◆ Once the tunnel option had been selected, McNeil Engineering prepared the necessary construction documents and provided the coordination between 2 cities, the county, UDOT, Jordan Valley Water Conservancy, Rocky Mountain Power, South Valley Sewer District, and The Jordan River Parkway Planning Commission.
