

## Landscape Architecture Project

### WAHWEAP RESORT MARINA – GLEN CANYON NATIONAL RECREATION AREA

### Resort & Recreation Project

#### PROJECT DESCRIPTION:

- ◆ Wahweap Resort located in Page, Arizona is considered one of the most economical and well-planned resorts of the National Park chain of resorts. Its inception was a joint effort between the National Park Service and the States of Arizona & Utah in conjunction with the concessionaire, Del Webb Company.
- ◆ The National Park Service saw a need to retain a land planning firm that could design and mediate the underlying concerns with the State Line issues and at the same time treat the environmental constraints imposed naturally by the existing physical resource.
- ◆ A Request for Proposal was created through the General Service Administration and many national and local firms responded. After a lengthy selection process, McNeil Engineering was selected to lead the various entities through the Master planning process. McNeil Engineering was the mediator during that process and coordinated the communications and resolution processes.
- ◆ McNeil Engineering also led the design team consisting of all the multi-disciplines necessary to complete the over-all master plan documents, as well as complete the design development plans which the private concessionaire is still implementing today.
