

Civil Engineering Project

HYATT GATEWAY Commercial Project

PROJECT DESCRIPTION:

- ◆ 1.5 acre site consisting of 64 parking stalls, drive-thru drop off and 17,700 square foot 4 story hotel building with 128 guest rooms and over 1000 square feet of meeting space.
- ◆ This upscale all-suite hotel designed for today's multi-tasking traveler became a reality through the close-knit design relationship McNeil Engineering developed with the Boyer Company.
- ◆ McNeil's skilled and professional staff of surveyors, civil engineers, and landscape architects, laid out the plans and provided the teamwork in accomplishing the project objectives. Designs were drafted to purposefully fashion civil engineering results in a non-visible solution that allows the viewer to see a magnificent edifice instead of the mundane infra-structure.
- ◆ McNeil Group is proud to be a major contributor to the Hyatt project's success by providing professional and quality services such as ALTA surveys, Civil Engineering, Landscape Architecture and Construction Staking.
