FOR IMMEDIATE RELEASE

McNeil Engineering and Hedman Engineering Announce Strategic Merger

Salt Lake City, UT — 02/09/2026 — McNeil Engineering is excited to announce a strategic merger with Hedman Engineering, a St. George, Utah-based engineering firm founded and led by Jeff Hedman. This partnership brings together two firms aligned by shared values, local commitment, and a hands-on approach to engineering, while strengthening McNeil Engineering's expanding services across the United States.

Hedman Engineering has built a strong reputation for delivering reliable, high-quality engineering services across a wide range of projects. Though led by a single principal, the firm has operated at the highest level, with the systems, experience, and professionalism of a much larger organization — a reflection of Jeff Hedman's leadership and deep connection to the region and his clients.

"I've long admired Hedman Engineering and have held deep respect for Jeff Hedman in particular. Having personally known him for nearly 20 years, this strategic merger feels like a dream come true—not just for the team at McNeil Engineering, but for every one of our combined clients. Together, we're positioned to deliver even greater value, innovation, and service excellence moving forward." — Matthew Roblez, Structural Manager, McNeil Engineering

As part of the merger, Jeff Hedman will continue to play a key role in serving the St. George market and beyond, ensuring continuity for existing clients while helping to grow McNeil Engineering's reach and capabilities throughout the 38 states in which Jeff is currently licensed.

"I'm excited to join forces with McNeil Engineering. After growing my firm independently, I saw the need for strong support to take the next step. McNeil provides the perfect platform to refocus on engineering—the work I love—while sharing administrative responsibilities with experienced partners. I've known and respected the McNeil team for nearly 20 years, and our aligned design philosophies and commitment to thorough engineering will drive even greater value for our clients. I am very excited to transition from a peer of McNeil Engineering to a partner." — Jeff Hedman, Principal Owner, Hedman Engineering

Clients of Hedman Engineering can expect a seamless transition, continued local support, and expanded access to McNeil Engineering's full suite of multidisciplinary engineering and consulting services.

This merger reflects McNeil Engineering's approach to intentional growth — forming partnerships that strengthen regional expertise while preserving the relationships and responsiveness that clients value most.
